Management Report

The Company's non-audited net sales for the fourth quarter of financial year 2010/11 were 1 995 168 LVL (2 838 868 EUR), representing 53% of the fourth quarter of the previous financial year. Reporting quarter was the weakest in this financial year unlike from last financial year 2009/2010 when fourth quarter was the best.

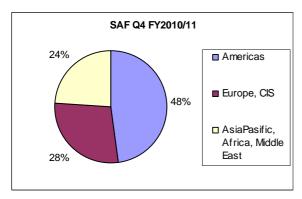

Sales in Americas represented the largest part of 4th quarter's turnover (48%) where sales rose by 40% or 271 thousand LVL (386 thousand EUR) compared with the same quarter of the previous corresponding period. Equipment deliveries for the Gigabit Ethernet network project in Manitoba province, in rural Canada has commenced in May (for additional information about the project please refer to our news release dated April 15, 2011 on www.saftehnika.com) and will be finalized in the 1st quarter of financial year 2011/12. Sales in Europe and CIS region formed 28% of quarterly sales, but were by 45% lower than in the 4th quarter of the previous financial year. The largest impact in quarterly sales comparative year-to-year decrease was from sales in Asia Pacific, Middle East and Africa region where sales dropped by 77% or 1.56 million LVL (2.22 million EUR). The main reason for decrease was the lack of similar scale projects in the fourth quarter of 2010/11 and various long-term project finalizations in the third quarter.

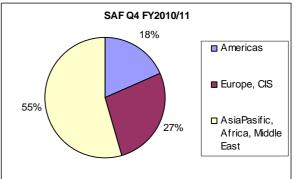

In order to strengthen presence in the strategic growth markets, the Company is considering opening local offices in a few countries. The first joint venture *SAF Tehnika Middle East Ltd.*, founded together with NAJAHAT Development & Investment Company (Saudi Arabia) has recently started its operations, thus confirming Middle East as one of the strategic growth markets for SAF Tehnika products. Moreover, the Company continues partner network development in the target markets. Several new distribution agreements were signed with North American companies in the reporting quarter.

In order to meet current and prospective clients, as well as demonstrate SAF Tehnika's products and provide individual consultations regarding products and their applications, the Company had participated at the regional exhibitions SVIAZ EXPOCOMM 2011, Moscow, Russia, and CommunicAsia 2011, held in Singapore. All SAF product lines were presented, however the most interest was shown in the CFIP product line - CFIP Lumina FODU, CFIP PhoeniX M Split Mount system and CFIP-108 FODU, which have already been used in numerous telecommunication projects all over the world The interest also was shown in the latest product - the long-haul point-to-point microwave system for industrial applications - CFIP Marathon.

The Company's products were sold in 48 countries during the reporting quarter.

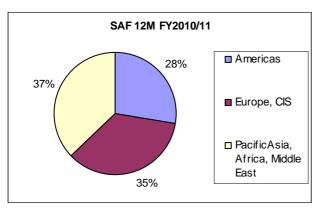

Chart 1. Quarter 4 revenue breakdown comparative charts:

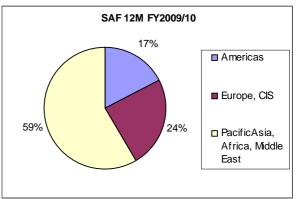

The Company's non-audited net sales for 12 months of the financial year 2010/11 were 10 896 072 LVL (15 503 714 EUR) representing a year-on-year increase of 7%. Sales in the Asia Pacific, Middle East and Africa region formed the largest sales proportion (37%) comprising 4.05 million LVL (5.76 million EUR) although it was by 32% less than in previous financial year 2009/10. Sales have increased year-on-year both in Americas and Europe, CIS regions. 68% sales increase was in Americas reaching 3 million LVL (4.3 million EUR) and 55% increase was recorded for Europe, CIS amounting to 3.8 million LVL (5.5 million EUR).

Chart 2. 12 months revenue breakdown comparative charts:

CFIP and CFM product sales represented 75% out of all sales in 12 months of financial year amounting to 8.2 million LVL (11.7 million EUR) showing increase by 26% or 1.7 million LVL (2.44 million EUR). As demand for CFQ products has decreased substantially, it has been decided to close the entire CFQ product line, providing the CFQ basic functionality with CFIP PhoeniX M split mount system. The Company forecasts that clients' requirements will be covered by full spectrum of CFIP and CFM products.

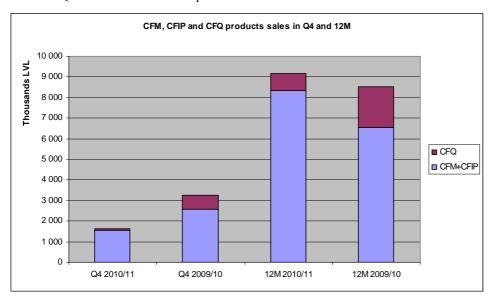

Chart 3. Quarter 4 and 12 months product sales breakdown.

The net loss of SAF Tehnika for the fourth quarter of financial year 2010/11 was -108 388 LVL (-154 221 EUR). This is the result of comparatively low sales during the quarter, additional provisions made for doubtful debtor and losses from foreign exchange.

The net profit of SAF Tehnika for the 12 months of financial year 2010/11 was 779 693 LVL (1 109 403 EUR) representing 52% of the net profit of previous financial year 2009/10.

The Company's net cash flow for the 12 month period of the financial year was a negative -307 027 LVL (-436 860 EUR). It has to be admitted that the Company's cash generated from operations was positive 192 059 LVL (273 275 EUR) and cash used in investing activities was positive 122 268 LVL (173 972 EUR) as well. Net cash used in financing activities was negative -621 354 LVL (-884 107 EUR) mainly impacted by dividends the Company paid in November 2010 (LVL 0.23 (twenty three santims) per share or, 683 141 LVL (972 022 EUR)). The Company carried a net cash balance (excluding interest bearing liabilities) of 2 096 881 LVL (2 983 593 EUR) as at June 30, 2011.

It has to be taken into account that the Company has deposited 1 479 081 LVL (2 104 543 EUR) (deposit period more than 90 days), recorded as a short-term investment in the balance sheet on June 30, 2011.

Market overview

The main discussion in the microwave industry continues to be about LTE implementation; however the mature technology of this mobile communication standard has not yet been defined.

The USA maintained its high business activity in spite of the economic collapse threat and protracted discussions on budget issues in the U.S. Congress.

At the time when some large wireless Internet service providers in North America were struggling to fight off bankruptcy and competition among microwave suppliers had become more fierce, SAF Tehnika did capitalize on this opportunity by broadening the distribution network and strengthening the Company's presence in the region.

According to the third parties research total global shipments of point-to-point radios in the calendar year 2010 have decreased by 9.3% compared to 2009. Nevertheless, SAF Tehnika has gained 50% larger market share, thus taking the 12th position in the world rankings instead of the no. 17 the year before.

Guidance

Since SAF Tehnika has moved from the regional sales approach towards country-based operations and the foundation of the joint venture in Saudi Arabia was announced, the launch of CFIP Lumina production in Curitiba (Brazil) convincingly reinforced the growth strategy initiated a few months ago. The CFIP Lumina inauguration event with attendance of Vice President of Brazil and the Prime Minister of Latvia has helped to raise the Company's visibility in Latvia as well as build and reinforce brand recognition in South America.

The demand for wireless transmission products is expected to be high over the coming years and SAF Tehnika, by elevating the focus on the Company's core competencies will continue to create new products that meet clients evolving needs and preferences. Furthermore, the Company has recently completed a long-term product development strategy focusing on the next-generation products and we are looking forward introducing the new version of CFIP Lumina in the near future. License-exempt SAF FreeMile products will be further developed and the deliveries of long-haul point-to-point microwave radio CFIP Marathon will grow as the demand of this Full Indoor unit is expected to rise in all regions, including Middle East, Asia Pacific and North America.

On June 30, 2011 the Company employed 164 people (146 people on June 30, 2010).

Note 10 Segment information

a) The Company's operations may be divided into two major structural units by product lines – CFM (Hybrid/ PDH radio) and CF IP (Hybrid/ super PDH system) as the first structural unit and CFQ (SDH) as the second unit. These structural units are used as a basis for providing information about the primary segments of the Company, i.e. business segments. Production, as well as research and development are organised and managed for each structural units (CFM, CFIP and CFQ) separately.

CFM microwave radio product line has been the main type of radio SAF has been supplying to the market over many years, yet it is still demanded and popular as ever. Such medium capacity, simple yet extremely reliable and feature rich radio forms the basis of many new deployments in the areas of rapid development of telecom networks.

CFIP - a new and growing product line is represented by 3 notable models,

- a split mount PhoeniX hybrid radio system with Gigabit Ethernet + 20 E1 interfaces;
- Lumina high capacity Full Outdoor all-in-one radio with Gigabit Ethernet traffic interface;
- CFIP-108 entry level radio perfect for upgrade of E1 networks into packet data networks.

All CFIP radios are offered in most widely used frequency bands from 6 to 38 GHz, thus enabling the use of CFIP radios all across the globe,

PhoeniX radio represents the type of microwave radio which is taking the commanding role on the market at present,

Full Outdoor units of Lumina and 108 modifications are of growing and developing radio type 'all-in-one' which has biggest potential as part of future data/packet networks.

SAF Tehnika was one of the first companies offering Full Outdoor radios from 2003, thus is well positioned to use the past experience for development of next generation product.

Even though mentioned CFIP products are set to carry SAF Tehnika's fortunes into the future, SAF is still offering a popular CFQ radio, still widely used due to an ability to reconfigure the terminal to provide widest range of interfaces in any SAF system.

This note provides information about division of the Group's turnover and balance items by structural units by product type for 12 month of the financial year 2010/11 and financial year 2009/10.

Salaries and social expenses, in comparison with the 12 month period of the previous financial year increased by 27% due to increased headcount and changes in fixed salaries for some part of employees. It has to be taken into account evaluating increase that due to a sales decrease in Q2 and Q3 FY 2009/10 workload for production was reduced by 20% on average and salaries were decreased accordingly. Salaries was returned back to previous level in Q4 FY 2009/10.

Bonuses and social expenses were accrued and paid quarterly based on financial and individual performance results. As financial targets has not been reached in Q4 the amount of bonuses accrued and paid for this quarter were substantially lower than for the first three quarters of financial year 2010/11.
